

EDUCATION

- Indian Institute of Information Technology, Raichur
B.Tech in Computer Science Engineering
- Ashoka Junior College (ISC) : **85%**
- Ashoka Universal School (ICSE) : **91.80%**

PROFESSIONAL EXPERIENCE

Founder TrackPay April'25

- Secured Pre-Incubation at IIT Madras with Grants **5.5L** to build an **AI-powered personal finance platform**.
- Defined product vision and roadmap for an Agentic AI Financial Assistant.
- Led end-to-end product development — **from user research and problem validation to feature prioritization** and ongoing iterative MVP builds.

Product Manager Intern Darwix AI March'26 - May'26

- Developed **investor pitch decks, pipeline reports, and strategic documentation** to support fundraising and business development initiatives.
- Managed an **Agentic AI Hiring Call product**, scaling operations to **5K+ automated calls** and **generating 300+ qualified leads**.
- Led **end-to-end development** of an **Omnichannel Sales Hiring platform** — from **product logic and workflow design** to **edge-case handling** and **MVP execution**. **Enabling 1K+ automated calls** and **driving 100+ high-quality candidate leads**.

POSITION OF RESPONSIBILITY

General Secretary (COSA) Oct'24 - Oct'25

- Spearheaded planning and execution of **20+ institute-level events (avg Footfall of 400+)**, managing end-to-end operations, logistics, and cross-team coordination.
- Oversaw a cumulative operational budget of **₹4+ Million**, ensuring structured allocation, vendor negotiations, and financial accountability.

Public Relations Secretary Nov'23 - Oct'24

- Directed **branding, outreach, and media strategy** for **30+ major events, increasing participation** and external visibility.
- Managed communications, **partnerships, and stakeholder engagement** to strengthen institutional collaborations.
- Led **digital presence** across platforms, driving engagement growth and structured content campaigns.
- Built **external networks with colleges, organizations**, and media channels to expand outreach footprint.

SCHOLASTIC ACHIEVEMENTS

- Ranked among **top 5%** of **1.2M** students in JEE
- MHT-CET: 97.1 percentile** among **7 lakhs+** applicants
- Reliance Scholar**

CERTIFICATION

Agile Foundations | IIBA

- Gained practical understanding of Agile methodologies (Scrum, Kanban), user stories, sprint planning, and iterative product delivery.

Breaking into Product Management | Geeks for Geeks

- Learned product lifecycle management, PRD writing, market research, roadmap planning, and data-driven decision making.

SKILLS

Tools & Technologies:

- Python (Pandas, NumPy), SQL, C, Cpp
- Data analysis & visualization
- AI/ML fundamentals; familiarity with LLM-based apps and prompt-driven workflows
- Langchain, Langgraph
- Basic understanding of agentic AI and autonomous systems
- Analytics tools, documentation tools (Notion/Jira-style)

Product & Business Skills :

- Product requirements & feature specifications (PRDs, user stories). Agile Methodologies, Business Analysis
- User research, workflow analysis, and requirements gathering
- Roadmap support, prioritization, and trade-off analysis
- Cross-functional collaboration with engineering, operations, and support
- Testing, user acceptance, launch support, and iteration
- Strong written & verbal communication; ownership in fast-moving environments

PRODUCTS & PROJECTS

HR : Automated Sales Hiring Process (Darwix AI)

- Developed **end-to-end product workflows, PRDs, scoring logic, and multi-channel automation pipelines** across Email, WhatsApp, and AI Voice Calls, reducing recruiter dependency and enabling scalable high-volume hiring operations.

Multi-Agent IPO Due Diligence System | GenAI, RAG

- Built an **agentic AI framework** to **automate IPO analysis** by combining **RHP document** understanding, **market sentiment mining**, and **peer valuation benchmarking**.
- Implemented a **RAG pipeline using LangChain**, ChromaDB, and sentence-transformer embeddings **achieving >84% retrieval accuracy on 500+ page financial documents**.
- Developed **autonomous agents for data scraping, sentiment scoring**, and competitor ticker mapping (**92% automation accuracy**).
- Integrated **Llama-3.3-70B via Groq API**, reducing end-to-end IPO report generation time to **~80 seconds through optimized LLM orchestration**.
- Tech: Python, LangChain, LLMs, RAG, ChromaDB, Streamlit, NLP, Multi-Agent Systems

IPO Sentiment Analyzer | NLP, DistilBERT Embeddings

- Developed an **NLP-based sentiment analysis system** to **classify IPO** and financial text into positive, neutral, and negative categories.
- Compared BiLSTM deep learning model with **DistilBERT embedding + Logistic Regression** pipeline, **achieving 90.4% accuracy and 21% improvement over LSTM baseline**.
- Built an end-to-end preprocessing and inference workflow using HuggingFace Transformers and Scikit-learn for financial sentiment intelligence.
- Tech:** Python, NLP, DistilBERT, Logistic Regression, TensorFlow, HuggingFace, Scikit-learn

Product Case Studies & Analysis

- Authored in-depth case studies and product decompositions demonstrating strategic product thinking,available at medium.com/@ashwhotosh.
